# Dental Care During Infancy, Early Childhood, and Pregnancy

## Children's Dental Services

**TEL: 612-746-1530**

### CHILDREN'S DENTAL SERVICES AT WIC

Children's Dental Services (CDS) provides full-spectrum preventive and restorative dental care to families at WIC centers and 500 other locations across Minnesota. Appointments can be made for individuals from birth to age 26 and pregnant people of all ages for:

- Exams (including X-rays and fluoride treatments)

- Cleanings (including sealants)

- Restorative work (including fillings, steel crowns, and extractions)

### CARE FOR INFANTS

Healthy baby teeth are a vital part of growing, healthy kids. Children's Dental Services specializes in pediatric dentistry and wants to see your child by the time he/she has a baby tooth!

**Why is dental care during infancy/ early childhood important?**

- Cavities in baby teeth should be addressed right away. They can cause painful infections and future dental health problems.

- Dentists can provide oral health tips for caring for a child's teeth, guidance on teething, and recommendations for bottle/pacifier use .

- Fluoride treatments at dentist visits help prevent cavities.

### CARE DURING PREGNANCY

CDS provides care to pregnant people of all  ages. We want to see you during your pregnancy!

**Why is dental care during pregnancy important?**

- Preventive and restorative dental work is vital to avoid oral infections, such as gum disease, which has been linked to pre-term birth, diabetes, and heart disease.

- Dentists can also discuss the oral health benefits of breastfeeding your baby.

**Is dental care during pregnancy safe?**

Yes! Pregnant people can safely receive all dental treatments, including X-Rays. Infected teeth that require restorative work, such as fillings and crowns, can be safely treated during pregnancy as well. Cavity treatments should be completed quickly to reduce the chance of infection.
